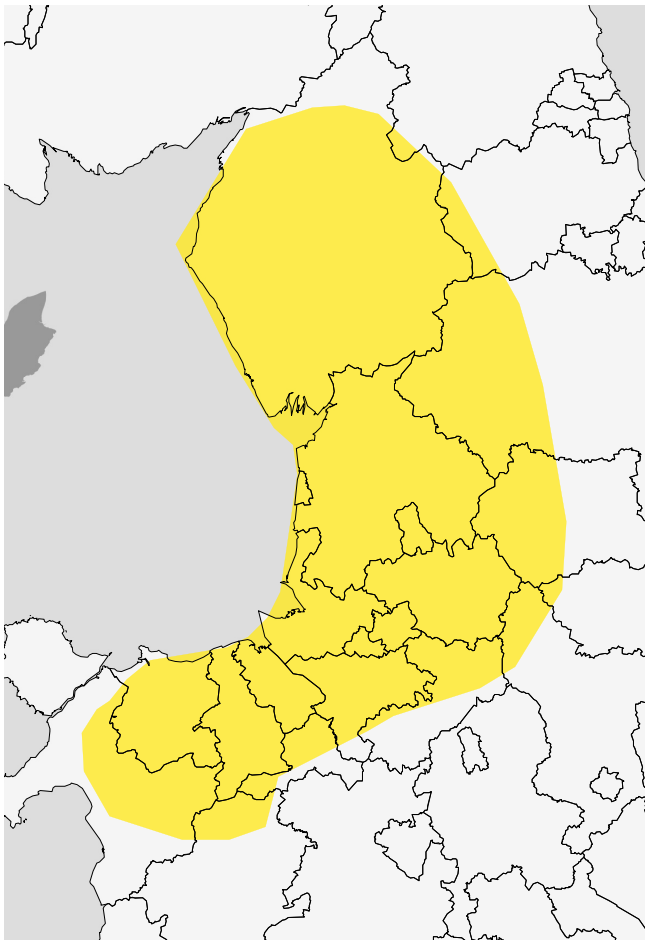
Yellow warning
Thunderstorm

Between
12:00 Sat 13 Jun 2020 and
19:00 Sat 13 Jun 2020



Some heavy showers and thunderstorms could disrupt travel and power in a few places.

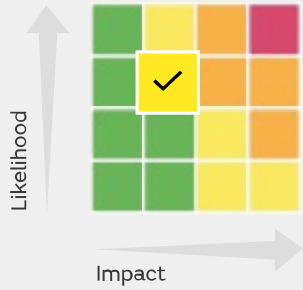
What to expect

- Some damage to a few buildings and structures from lightning strikes is possible
- There is a good chance driving conditions will be affected by spray, standing water and/or hail, leading to longer journey times by car and bus
- Some short term loss of power and other services is likely
- There is a small chance of some flooding of a few homes and businesses

Further details

Scattered heavy showers and thunderstorms are likely to develop on Saturday, initially over parts of north Wales and the southern part of northwest England around midday, and then later in the afternoon across Cumbria and the north Pennines. Most of these will not last long but could produce 20 mm rain in less than an hour, leading to some localised flooding. Lightning strikes and hail will be additional hazards in places.

The showers and thunderstorms will slowly die out from the south later this afternoon and through the early evening.



✓ Medium likelihood of low impacts
